

Offensive Security, the leader in Online Penetration Testing Training and Certification for InfoSec Professionals, is proud to announce a new partnership dedicated to students in Networks & Informatic Systems Security university course @ University of Milan (ITALY) for its Penetration Testing with Kali (PWK) course (elearning, english-only) and the associated OSCP certification exam.

Eligibility:

In order to be eligible to access the agreement, you must:

Be enrolled in the Networks & Informatic Systems Security course (at least 2nd year for both BSc and MSc) AND own a valid @studenti.unimi.it email address;

OR

Have completed your degree (BSc/MSc) **AND** still own a valid @studenti.unimi.it email address (UniMi mailboxes last 2 academic years after the last enrolment renewal, see [here](#));

What do you need to do:

- 1) Apply via the form at: <https://www.offensive-security.com/university-of-milan/>
- 2) Follow the instructions that will be sent on your UniMi email address

Please note that:

- Students can request their enrolment status certification by themselves via [UNIMIA](#);
- If you already graduated, be ready to provide proof of graduation, e.g. photo of diploma;

Partnership benefits:

Eligible students can benefit of a **15% discount** on the PWK course packages reported below:

Course Packages	Standard Pricing (USD)
Penetration Testing with Kali + 60 days Lab access + OSCP Exam Certification Fee	USD 1000.00
Penetration Testing with Kali + 90 days Lab access + OSCP Exam Certification Fee	USD 1,150.00

→ For example, PWK + 60 days lab + exam voucher would cost USD 850.00

Limitations:

The offer is valid for purchases before DEC 31st, 2020 and cannot be combined with other promotions.

COURSE INFORMATION:

Penetration Testing with Kali (PWK) is a self-paced, online course that introduces students to the latest ethical hacking tools and techniques. In addition to a traditional course guide and video-based lectures, each student receives access to a virtual penetration testing lab where techniques learned within the course can be practiced in a safe and legal environment. You will learn to conduct a penetration test from start to finish through hands-on experience within a target-rich, diverse, and vulnerable network environment. Upon successful completion of the course and certification exam, you will officially become an Offensive Security Certified Professional (OSCP), which is among the most respected and sought-after designation within the information security space: surveys have found our students are employed much faster on average by top companies around the world, with a salary of \$10,000/year higher over those who don't hold an OSCP.
